THE HISTORY OF DISCO AND POP

It was created in the 1960s as a reaction to the dominance of rock music. At first, it was watched by Italian-Americans and African-Americans, but later it spread to the rest of the world. With the acceptance it experienced in the 70s, it moved into pop culture as Disco-Pop.

Discotheques

The places that used to do disco concerts were called discotheques, and today there are many more, but they do not have the recognition they had in 1970. Rarely will anyone find a discotheque that still operates.
